

# UX DESIGN AND VISUAL

ENGLISH 110

# COMMUNICATION

The way things **LOOK** can be as important as what they **SAY**. In this class we learn visual design from the perspective of writers, figuring out the fundamentals through projects like cookbooks, poster layouts, and band flyers. After we get the basics down, we unleash our skills on the world of UX development, designing User Interfaces and prototyping phone apps that solve real-world problems. Great new skills for your professional toolkit!
